

DEER BROOK

Information Security . Privacy . Technology

What's Assessed?

- **Policy and Practices**

These are the first line of defense against phishing and credential compromises.

- **Configuration and Vulnerability Management**

Ensuring that your computers and other infrastructure are secure is foundational.

- **Remote Access**

How your team accesses systems is critical to enabling remote work – and keeping the bad guys at bay.

- **Data Security**

Encryption and other technologies protect your and your customers' sensitive data.

DEER BROOK'S HOMEWORK ASSESSMENT: Cyber Peace of Mind

Deer Brook's Homework Assessment is a simple, fast, and insightful way to identify your work-from-home risk. Unlike generic internet tips, Deer Brook focusses on your business context to hone-in on the most relevant practices to keep you safe. Our process involves basic steps:

Collect. We provide you with a lightweight, focused survey of your practices, tech, and home-work approach. We will also look at documents, like HR or technology policies, in a secure portal for review.

Review. We assess your approach and conducts a short interview with you, your IT team, or vendors like a Managed Services Provider to get technical details.

Explore. We perform a technical review of computers and networks to verify settings and identify the unexpected.

Recommend. We brief you, including a written report, with context-specific ideas to enhance your cyber posture.

Options. Deer Brook's Homework Assessment can be expanded to include services such as a penetration testing, configuration reviews, or breach planning.

Like all the risks to your business, you can't manage those of which you're unaware. Get the visibility to cyber risk you need today. Call us at 207.387.0396 or send us a note at info@deer-brook.com.
